+5 years of experience in systems and tools development, including almost 2 years in web development. Throughout my professional journey, I have worked with various clients, understood their concerns, and developed tools tailored to their needs. Currently, I am deeply involved in web development, utilizing a diverse set of technologies and skills that I have acquired over the years. I am committed to continuing to leverage my full potential to make a meaningful impact on projects and contribute to success in my role.

TEAM PROJECTS

Medical App — December, 2022 - March, 2023

- Worked on the front-end development of a clinic patient management project, focusing on the design of the platform's web application.

Stack tecnológico: Next Js - React - Redux - Typescript.

ChatBot Platform — abril, 2022 - noviembre, 2022

- Developed interfaces and component libraries for various web and mobile applications to create a chatbot platform.
- Implement the Express - GraphQL server to handle the APIs of different microservices.

Stack tecnológico: React - React Native - Redux - GraphQL - SQLite - Storybook - Express.

ADDITIONAL EXPERIENCE

Inventory System — octubre, 2021 - diciembre, 2021

- Collaborated in the development of a tool and parts inventory manager, enabling the registration, control, and reporting of stocks, assignments, and requirements of more than 100 workshop toolboxes.

Payroll System — enero, 2019 - julio, 2019

- Designed a payroll program that automated calculations and generated payroll reports, reducing preparation time by more than 50% and minimizing payment errors.

Selling System — enero, 2018 - febrero, 2018

- Developed and implemented a sales and inventory system that contained 30 spreadsheets, 35 forms, and 22 modules.
